Streamlining IT Procurement: Automating Standard Laptop Orders with IT Procurement

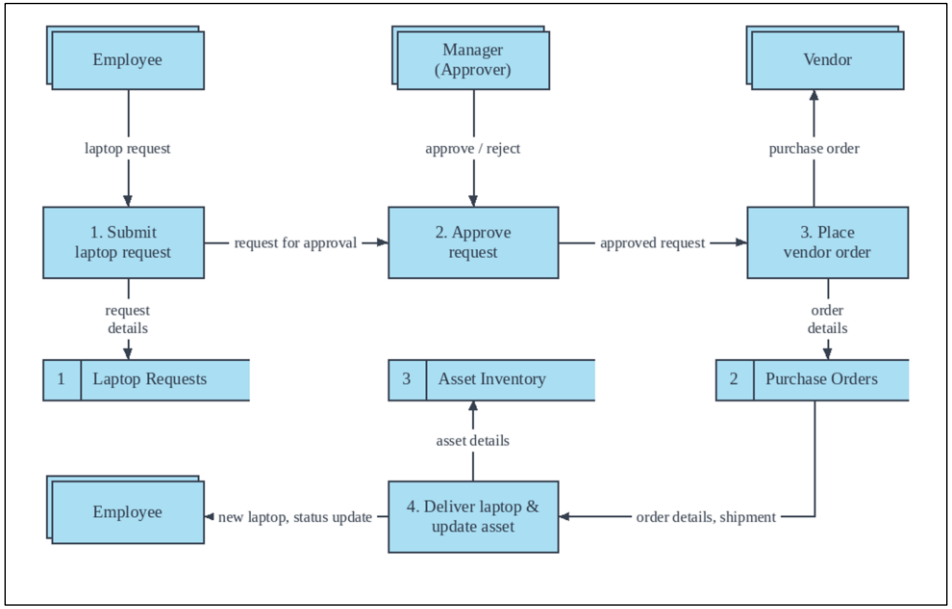

A Data Flow Diagram (DFD) is a visual representation of how information flows through the standard laptop ordering process. It shows how a laptop request enters the system from the employee, how it is approved by the manager, how the purchase order is passed to the vendor, and where request, order and asset data are stored. A clear DFD helps the team understand which steps of IT procurement can be automated.

Example: DFD Level 1 (Simplified)

1. Employee submits a standard laptop request through the IT service portal.
2. The workflow validates the request and sends it to the manager for approval.
3. Manager approves or rejects the request.
4. Approved request automatically creates a purchase order for the vendor.
5. Laptop is delivered, the asset inventory is updated and the employee is notified.

DFD Level 0 - Automating Standard Laptop Orders

User Stories

Use the below template to list all the user stories for the standard laptop order automation.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Employee	Laptop Request	USN-1	As an employee, I can log in to the IT service portal using my company credentials.	I can access the portal and view the laptop catalogue	High	Sprint-1
		USN-2	As an employee, I can select a standard laptop model from the catalogue and submit a request.	The request is created with predefined specifications and a request ID	High	Sprint-1
		USN-3	As an employee, I will receive a confirmation email once my request is submitted.	I receive a confirmation email with the request ID	Medium	Sprint-1
	Order Tracking	USN-4	As an employee, I can track the status of my laptop order.	I can see the current status (Pending, Approved, Ordered, Delivered)	Medium	Sprint-2
		USN-5	As an employee, I will receive a notification whenever my order status changes.	I receive an email or chat notification for every status change	Low	Sprint-2
Manager (Approver)	Approval	USN-6	As a manager, I can review and approve or reject my team member's laptop request.	The decision is recorded and the employee is notified	High	Sprint-1
		USN-7	As a manager, I will receive reminders for pending approvals.	I receive a reminder if a request is not actioned within 24 hours	Medium	Sprint-2
IT Procurement Executive	Vendor Order	USN-8	As a procurement executive, I want approved requests to automatically create a purchase order for the vendor.	A purchase order is generated and sent to the vendor without manual entry	High	Sprint-2
		USN-9	As a procurement executive, I can view all pending and completed laptop orders in a dashboard.	I can filter orders by status, date and vendor	Medium	Sprint-3
Administrator	Configuration	USN-10	As an administrator, I can manage the standard laptop models and specifications in the catalogue.	I can add, edit or remove catalogue items	High	Sprint-1
	Asset Management	USN-11	As an administrator, I want delivered laptops to be added to the asset inventory automatically.	An asset record is created with the serial number and assigned user	Medium	Sprint-3
	Reports	USN-12	As an administrator, I can generate reports on laptop orders and turnaround time.	I can view and export the reports	Low	Sprint-3
