Project Design Phase
Solution Architecture

Date	28 September 2026
Team ID	SWTID-2026-1286
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with IT Procurement
Maximum Marks	4 Marks

Solution Architecture:

For the IT procurement automation project, the solution architecture bridges the gap between the manual laptop ordering problem and the automated procurement portal that solves it. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.
