Project Executable Files

Date	29 September 2026
Team ID	SWTID-2026-1286
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
College	Balagan Saraswathi Arts and Science College For Women (MSU144)
Team Leader	P Ameena Absana
Team Members	Sakthi Subiksha B, Udhaya Shofana, Sahaya Pradeeba J

Project Executable Files

This section lists all executable and deployable items for the project "Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer". The solution is built on ServiceNow, so it is deployed as configuration on a ServiceNow instance rather than as separate source code.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)	Remarks
1	Complete source code (all files and folders)	NA	Low-code project. Built with ServiceNow Flow Designer (Flow: "Standard laptop task"); no separate code files.
2	README / Setup Guide (instructions to run the project)	Yes	Step 4 of this document and the project report (Streamlining_IT_Procurement.pdf).
3	requirements.txt / package.json / dependency file	NA	No external dependencies; runs on a ServiceNow instance.
4	Database schema / seed files (if applicable)	NA	Uses ServiceNow out-of-the-box tables (Request, Requested Item, Catalog Task).
5	Environment configuration file (.env.example or similar)	NA	No environment file needed.
6	Deployed application URL (if hosted)	Yes	ServiceNow Developer instance (see Step 3).
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA	Web-based (ServiceNow) solution.
8	Dockerfile / Containerization config (if applicable)	NA	Not containerised.

S.No	Item to Submit	Submitted (Yes / No / NA)	Remarks
9	Test files and test results	Yes	Test screenshots in project report: REQ0010002, RITM0010002, SCTASK0010002.
10	Demo video or walkthrough (if required)	[Yes / No]	[Update after uploading; add link in Step 3]

Step 2: File / Folder Structure

Overview of the project's components and files:

```
/streamlining-it-procurement
|-- ServiceNow Instance (dev429096.service-now.com)
|   |-- Flow Designer > Flow: "Standard laptop task" (Application: Global)
|   |   |-- Trigger : Service Catalog
|   |   `-- Action 1: Create Catalog Task
|   |              (Short description = "Laptop need to Configured",
|   |               Assignment group = Hardware, Approval = Approved)
|   |-- Maintain Items > Standard Laptop > Process Engine > Flow
|   `-- Service Catalog > Hardware > Standard Laptop (Order Now)
|-- /docs
|   |-- Streamlining_IT_Procurement.pdf   - Project report with screenshots
|   `-- Project_Executable_Files.pdf      - This submission document
`-- /test-records
    |-- REQ0010002    - Request
    |-- RITM0010002   - Requested Item
    `-- SCTASK0010002 - Catalog Task (Assignment group: Hardware)
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://dev429096.service-now.com
Login Credentials (Demo)	Username: [enter demo username] Password: [enter demo password]
Platform / Hosting Provider	ServiceNow (Personal Developer Instance)
Repository Link	[paste GitHub / Drive link here]
Demo Video Link	[paste demo video link here]

Step 4: Run Instructions

Step-by-step instructions for the evaluator to run the project:

Pre-requisites:

A ServiceNow instance (Personal Developer Instance) with admin access, and a modern web browser (Chrome / Edge). Internet connection required. The catalog item "Standard Laptop" (Service Catalog > Hardware) must be available.

Step 1: Open ServiceNow and log in with the demo credentials. Click All, search for Flow Designer and open it under Process Automation.

Step 2: Click New > Flow. Flow Name: "Standard laptop task"; Application: Global; Run user: System user. Click Submit.

Step 3: Click Add a trigger, search for "Service Catalog", select it and click Done.

Step 4: Under Actions, click Add an action, search for "Create Catalog Task" and select it. Drag the Requested Item Record from the Data panel into the Request item field.

Step 5: Set Short description = "Laptop need to Configured". Add field values: Description = "Laptop need to Configured", Assignment group = "Hardware", Approval = "Approved". Click Done.

Step 6: Click Save, then Activate (confirm Activate again in the pop-up).

Step 7: Open All > Maintain Items > Standard Laptop > Process Engine tab. Remove other automations, add the Flow "Standard laptop task" and save the record.

Step 8: Open Service Catalog > Hardware > Standard Laptop and click Order Now. Click the Request Number (e.g. REQ0010002).

Step 9: In the Approvers tab, right-click the approval record and choose Approve.

Step 10: Open the Requested Item (RITM) > Catalog Tasks section > open the task. Verify Short description = "Laptop need to Configured" and Assignment group = Hardware.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Flow triggers only from the Service Catalog; it works only for the configured Standard Laptop item.	Attach the flow to other catalog items via Process Engine when needed (future enhancement).
2	No automatic notification is sent to the user about request status.	Not implemented; planned as a future enhancement.
3	Requires ServiceNow and Flow Designer knowledge; flow must be updated if the procurement process changes.	Maintain flow documentation; update and re-activate the flow after changes.
